

Facts and Figures

4. Coastal Storm Damage Risk Reduction Studies (\$28 million)
Work under this category includes completion of ongoing Corps of Engineers flood and storm damage risk reduction studies that were underway at the time of Hurricane Sandy and received funding in any of the three fiscal years prior to enactment of the Disaster Relief Appropriations Act of 2013.

17 Studies
Rhode Island: 2 studies
New York: 5 studies
New Jersey: 9 studies
Delaware: 1 study

5. Continuing Authorities Program (\$27 million)
This program allows the Corps of Engineers to plan, design, and construct smaller projects under existing program authorities in place from Congress.

7 Projects
Massachusetts: 2
New York: 1
New Jersey: 1
Delaware :1
Maryland: 1
Virginia: 1

North Atlantic Coast Comprehensive Study

The North Atlantic Coast Comprehensive Study (NACCS) is a collaborative effort bringing together governmental, academic, and non-governmental experts in coastal planning, engineering and science to collaboratively develop a risk reduction framework for the 31,000 miles of coastline within the North Atlantic Division that were affected by Hurricane Sandy. The \$19 million study will be submitted to Congress in January 2015. For more information on the NACCS, visit <http://www.nad.usace.army/CompStudy>.

Updated 10/2014

Hurricane Sandy Coastal Management

Facts and Figures

October 2014

With the passage of the Hurricane Sandy Disaster Relief Appropriations Act of 2013, the U.S. Army Corps of Engineers has both the authority and the funding to repair and complete ongoing coastal storm damage risk reduction projects and studies in the Northeast. These projects and studies seek to reduce the vulnerability of the region from future storms.

U.S. Army Corps of Engineers
North Atlantic Division

Facts and Figures

The Disaster Relief Appropriations Act of 2013 (PL 113-2) appropriated more than \$5 billion to the U.S. Army Corps of Engineers to address areas impacted by Hurricane Sandy. The Corps' North Atlantic Division received more than \$4 billion of this funding. Under the Disaster Relief Appropriations Act, the North Atlantic Division will be executing projects and studies in the following five categories.

1. Near-Term Coastal Restoration (\$455 million)
Funded through Flood Control and Coastal Emergencies appropriations, this work restores previously constructed Corps projects that were severely impacted by Hurricane Sandy. Degraded coastal features increase risks and vulnerability from future storm events. This work entails placing more than 26 million cubic yards of sand.

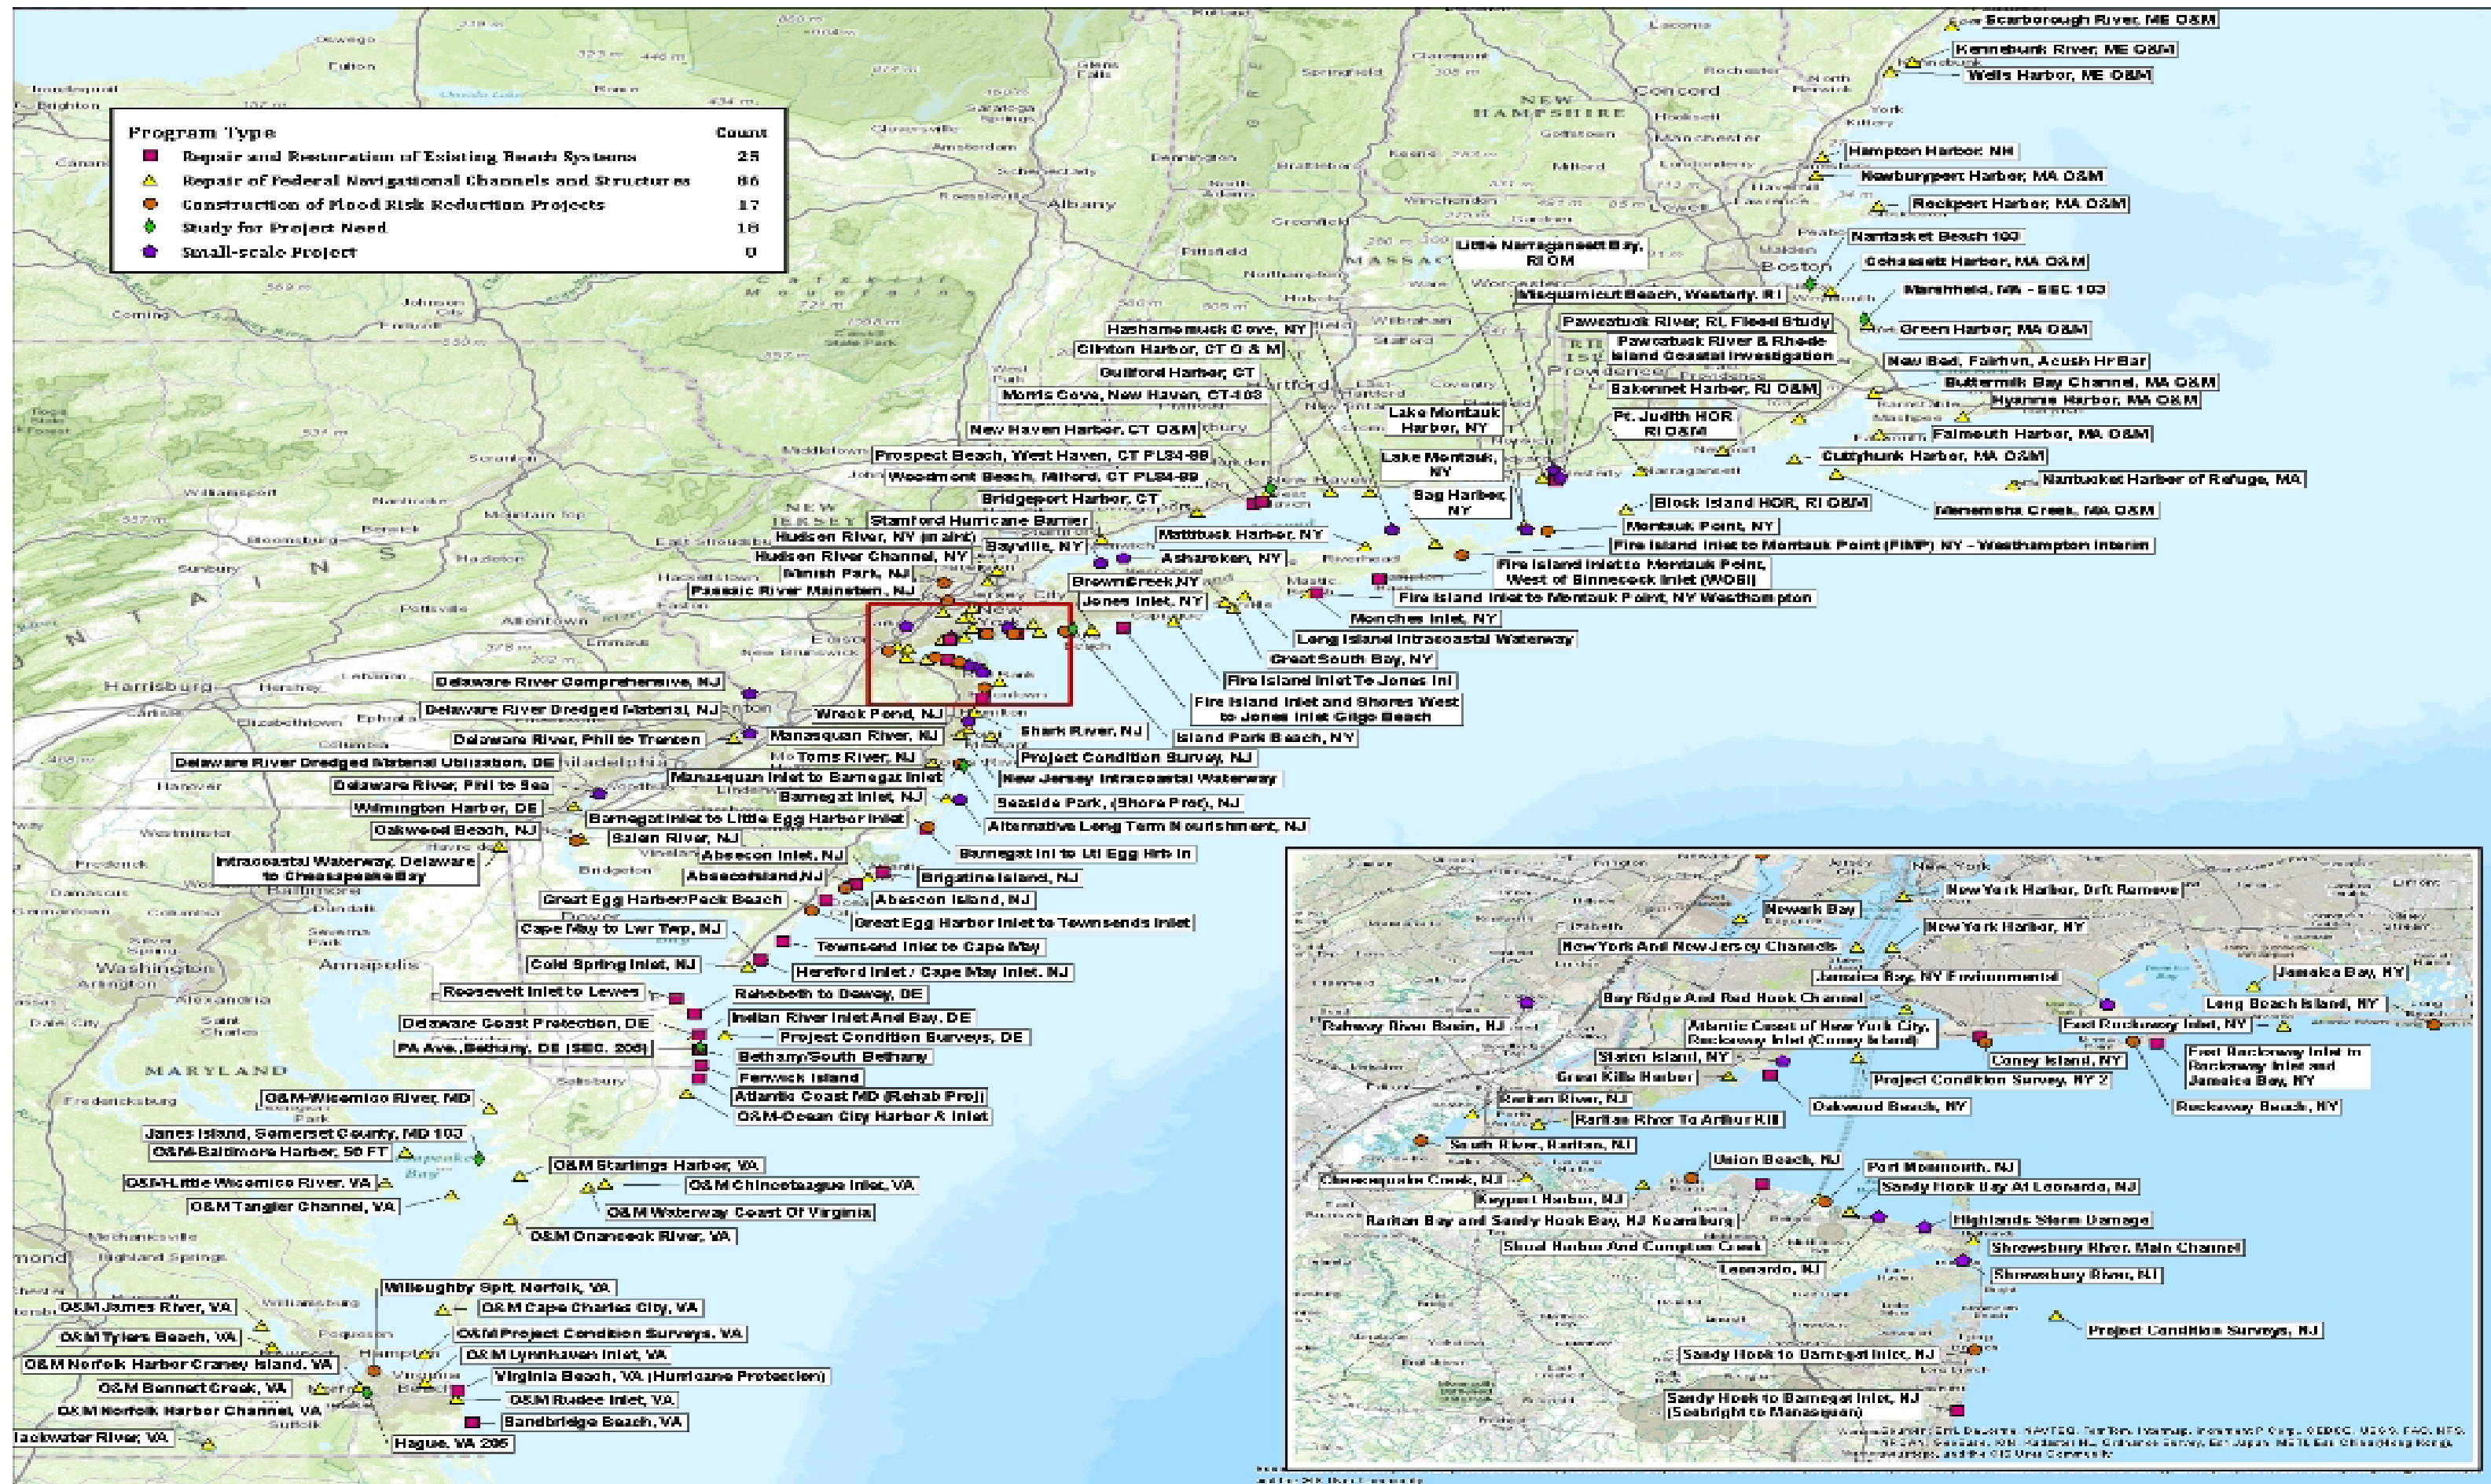

25 Approved Projects	20 Completed Projects
Rhode Island: 1	Rhode Island: 1
Connecticut: 2	Connecticut: 1
New York: 8	New York: 6
New Jersey: 6	New Jersey: 4
Delaware: 5	Delaware: 5
Maryland: 1	Maryland: 1
Virginia: 2	Virginia: 2

2. Operations and Maintenance (\$358 million)
Work in this category entails repair of Sandy-damaged navigation channels and structures that the Corps has built and maintains. These projects include surveys and repairs to breakwaters, storm surge barriers, jetties, bulkheads and revetments, as well as restoration of federal navigation channels that experienced shoaling as a result of Hurricane Sandy.

86 Approved Projects	48 Completed Projects
Maine: 3	Maine: 1
Massachusetts: 11	Massachusetts: 6
New Hampshire: 1	New Hampshire: 0
Rhode Island: 3	Rhode Island: 1
Connecticut: 6	Connecticut: 1
New York: 17	New York: 11
New Jersey: 20	New Jersey: 11
Delaware: 5	Delaware: 5
Maryland: 3	Maryland: 1
Virginia: 16	Virginia: 10

3. Authorized But Not Yet Constructed (ABU)/Construction (\$2.4 billion)
These include constructing flood and storm damage risk reduction projects at sites where either an ABU Corps project or partially-constructed Corps project existed; or new projects that resulted from the Coastal Storm Damage Risk Reduction Studies as described in that category (please see #4).

17 Projects
New York: 7 projects
New Jersey: 10 projects
Virginia: 1 project
